

Decision With Insight

The changing paradigm in maritime sector demands faster, factual and multi-dimensional decisions. To assist maritime managers and leaders to take decision with insight, EMIS will play a vital role. In core it helps in changing data to business intelligence, and in surface showing those in more graphical forms. Picture speaks thousand words and EMIS truly justifies this statement.

In rapidly changing maritime market segment, the business drivers change fast. It is imperative to analyze the data with different dimension and EMIS helps the user to analyze the data as per user set parameters and which can be further drilled down as required. What if scenarios, pivoting & more data functions, no more requires highly trained computer specialists.

EMIS brings those functionalities to the realm of users who may not be very computer savvy. Interactive, user-driven, customizable are three corner stones for EMIS. In a nutshell, it can be said that EMIS is truly a next generation of business driving solution.

How beneficial is it?

- ➔ Help in taking more factual and quicker decisions
- ➔ Create more space for maritime managers and leaders to focus on core business and not wasting time in non core activities
- ➔ Increased productivity
- ➔ Value added quality information and business intelligence
- ➔ Direct impact on bottom line
- ➔ Success with satisfaction

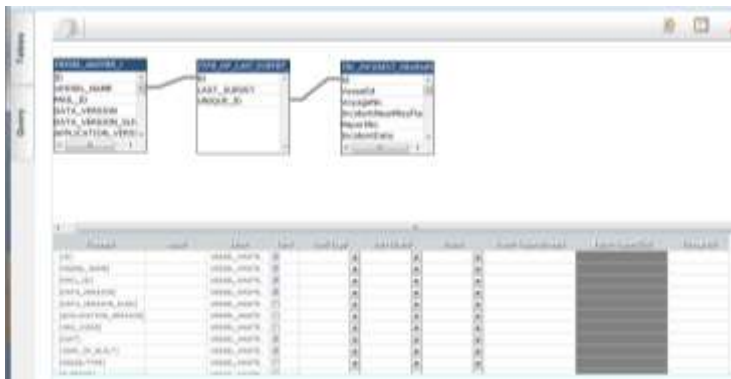

Dashboard
