VEHICLE TRACKING

Decision With Insight

Vehicle tracking system is an advanced product which is used to track the movement of any automobile in real time. Tracking and managing the movement of the vehicle can be done synchronously.

Features

➡	**Live Tracking**	Real time, web based monitoring.
➡	**Mobile Access**	Manage your path even when you are on move.
➡	**Daily Snapshot**	Snapshot of the vehicle movement at regular intervals.
➡	**Report and Analysis**	Detailed time stamps over the entire movement of the Vehicle.
➡	**User Management**	Creation and Management of users.

How beneficial is it?

➡ Reduce operational cost with efficient and effective use of vehicles/assets.

➡ Detect over speeding, route violations, and idle time.

➡ Prevents unauthorized operation of vehicles.

➡ Paperless system for managing your fleet.

➡ Visual reports making it more detailed and informed.

➡ Improved ability to control operations and driver performance.

➡ Reduced need for supervisors and manual data entry.

➡ Better adherence to schedule, accuracy in monitoring and coordination.

➡ One stop dashboard for monitoring your fleet.

Functionality

➡ Overall management of Vehicles/Assets.

➡ Visually monitor the entire vehicle movement.

➡ Monitor and track the vehicle in real time over the web.

➡ Detailed analytic report on the entire path covered by the vehicle.
